High Gloss  
and Supermatt

**RENOLIT 2D**  
PET laminate in  
High Gloss  
and Supermatt

## The kitchen that can also take knocks.

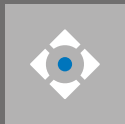

RENOLIT PET laminate made in Germany: High Gloss, with optimum surface stability and a depth effect as if it were behind glass. Supermatt, offering tactile pleasure and a look to satisfy both hand and eye. This and much more is offered by the new RENOLIT PET laminate – and it meets the most exacting demands for workability and durability.

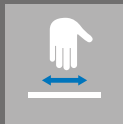

*Surface stability*

*Scratch-resistant*

*Easy to shape*

*No 'stop' feeling*

*Anti-fingerprint*

*Easy to clean*

## The calm after the storm – the new PET laminate by RENOLIT with optimum surface stability.

Our RENOLIT PET laminate is a high-tech product for applications in the furniture and caravan industries, combining outstanding surface stability with an excellent depth effect and offering the greatest possible durability. Both the 2D and 3D versions of the sheets are easy to shape by thermoforming. Even with hard use over long periods of time, RENOLIT PET laminate looks as new – the perfect partner for the private kitchen and all furniture fronts which have to endure that little bit more.

### Outstanding surface stability

Even when things get a little hectic in the kitchen – our RENOLIT PET laminate will impress with its outstanding surface stability, offering tactile pleasure without any 'stop' feeling.

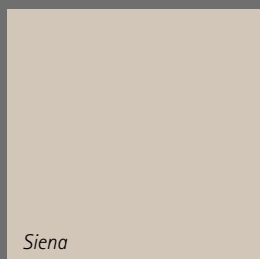

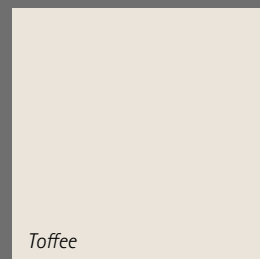

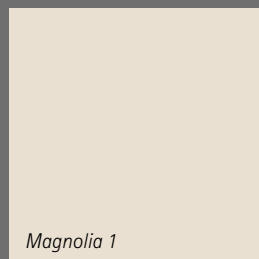

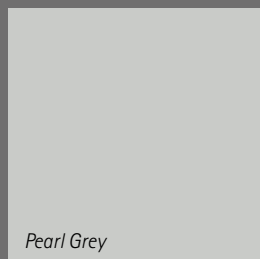

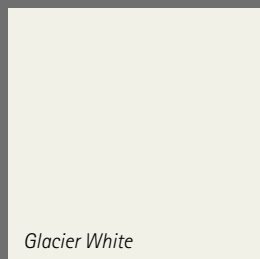

### Scratch and impact-resistant

A good kitchen front must be able to take a few knocks, offer good surface durability and not get scratched too easily. RENOLIT PET laminate satisfies all these requirements.

### Easy to clean

A kitchen that should be fun not only when you are cooking must be easy to clean. RENOLIT PET laminate prevents fingerprints thanks to our anti-fingerprint technology, and requires minimal care.
